

At Camanchaca S.A and its subsidiaries, we are formally committed to sustainability and the proper use of energy in the processes and activities of our businesses. We consider it essential to establish concrete and appropriate actions aligned with the organization's objectives for our energy management. Therefore, we will require the support of the company's staff, contractors, and suppliers, so that we can work together to comply with the following guidelines:

1. **Establish an energy culture** by implementing practices that promote awareness of energy consumption and its impact.
2. **Continuously improve** our energy performance and the operation of the Energy Management System.
3. **Ensure a instance where we can define and review energy objectives and targets**, in accordance with a concrete action plan.
4. **Ensure** the allocation of human, financial, and material resources that allow us to achieve the set objectives and targets, as well as ensuring the **availability of information** to achieve them.
5. Promote the **acquisition of energy-efficient products and services**, along with considering improvements in **energy performance** and operational control in the design of our projects.
6. Periodically **review legal requirements** related to energy efficiency, the use and consumption of energy that apply to us, and ensure compliance.

I invite everyone to promote this policy in our daily activities, through our actions and decisions, and also to raise awareness about the importance of sustainable development in our company. With the measures and suggestions outlined, we can continue improving our processes to be more efficient and environmentally friendly, which is the essence of our business.

In Santiago, October 2022.

RICARDO GARCIA HOLTZ
GENERAL MANAGER
Camanchaca S.A and Subsidiaries
