

Información de Centros de Cultivo en Proceso de Certificación Aquaculture Stewardship Council (ASC)

WILLIAMS S2 2025-01

Fatal incidents on wildlife as a result of the operation:

We have had no fatal wildlife incidents during the current production cycle.

Periodic monitoring for Caligus (Caligus rogercresseyi) carried out by the farm:

Week	Ovigerous Females	Adults
2024-28	0,00	0,00
2024-29	0,00	0,12
2024-30	0,68	2,23
2024-31	0,65	2,67
2024-32	1,85	5,18
2024-33	0,45	1,15
2024-34	0,90	0,95
2024-35	1,47	2,33
2024-36	1,27	1,83
2024-37	1,05	0,95
2024-38	1,12	0,73
2024-39	2,65	2,83
2024-40	2,92	2,82

Week	Ovigerous Females	Adults
2024-41	2,53	2,23
2024-42	1,70	1,58
2024-43	2,60	2,58
2024-44	2,77	3,43
2024-45	1,18	0,80
2024-46	2,38	2,33
2024-47	2,63	5,22
2024-48	2,82	4,55
2024-49	2,92	2,77
2024-50	4,85	3,22
2024-51	0,80	0,55
2024-52	1,73	2,13
2025-01	3,55	3,45

Calculation of unexplained losses estimated for the farm during the finished production cycle

The current production cycle has not yet closed.

List of transgenic vegetable raw materials used in more than 1% in fish feed used in WILLIAMS S2:

Raw material	Inclusion	Source	GMO
Soy flour	0 - 5 %	Argentina	YES
Soy Protein Concentrate	0 - 20%	Brasil	YES
Canola oil	10 - 25%	Chile - Canadá	YES
Oleinmix	0 - 8 %	Argentina	YES
Acidified Oil	0 - 10%	Chile	YES
Corn Gluten	0 - 15%	USA	YES

Pharmaceutical Products used in the current production cycle:

Se realizaron tratamiento(s) parasitario:

Se realizó 3.0 tratamiento(s) de B. Emamectina

Se realizó 1.86 tratamiento(s) de Azametifos

Se realizaron tratamiento(s) antibiotico:

Se realizó 1.0 tratamiento(s) de Florfenicol

Assessment reports in case of statistically significant mortalities (monthly) in the farm, in which an unknown transmissible agent causing fish diseases was suspected or confirmed, notify them to the OIE:

In the current production cycle of the farm, we have not had statistically significant increases in mortality (monthly) related to suspicions of transmissible agents of unknown origin, which are included in the list of diseases notifiable to the OIE.

Loncochalgua 2025-01

Fatal incidents on wildlife as a result of the operation:

We have had no fatal wildlife incidents during the current production cycle.

Periodic monitoring for Caligus (Caligus rogercresseyi) carried out by the farm:

Week	Ovigerous Females	Adults
2024-46	0,10	0,40
2024-47	0,00	0,12
2024-48	0,00	0,00
2024-49	0,12	0,02
2024-50	0,00	0,03
2024-51	0,10	0,10
2024-52	0,03	0,18
2025-01	0,15	0,17

Calculation of unexplained losses estimated for the farm during the finished production cycle

The current production cycle has not yet closed.

List of transgenic vegetable raw materials used in more than 1% in fish feed used in Loncochalgua:

Raw material	Inclusion	Source	GMO
Soy flour	0 - 5 %	Argentina	YES
Soy Protein Concentrate	0 - 20%	Brasil	YES
Canola oil	10 - 25%	Chile - Canadá	YES
Oleinmix	0 - 8 %	Argentina	YES
Acidified Oil	0 - 10%	Chile	YES
Corn Gluten	0 - 15%	USA	YES

Pharmaceutical Products used in the current production cycle:

Se realizaron tratamiento(s) parasitario:

Se realizó 0.17 tratamiento(s) de Hexaflumuron

Assessment reports in case of statistically significant mortalities (monthly) in the farm, in which an unknown transmissible agent causing fish diseases was suspected or confirmed, notify them to the OIE:

In the current production cycle of the farm, we have not had statistically significant increases in mortality (monthly) related to suspicions of transmissible agents of unknown origin, which are included in the list of diseases notifiable to the OIE.

Benjamin 2025-01

Fatal incidents on wildlife as a result of the operation:

We have had no fatal wildlife incidents during the current production cycle.
