

Salmones Camanchaca

Navigating the waves post-IPO

Ricardo García, Vice Chairman

NASF | Bergen, 5 March 2020

An aerial photograph of a river with rapids. The water is dark blue and turbulent, with white foam from the rapids. The riverbed is composed of dark, wet rocks. On the right side, there is a dense forest of green trees. A large, fallen log lies on the riverbank near the rapids.

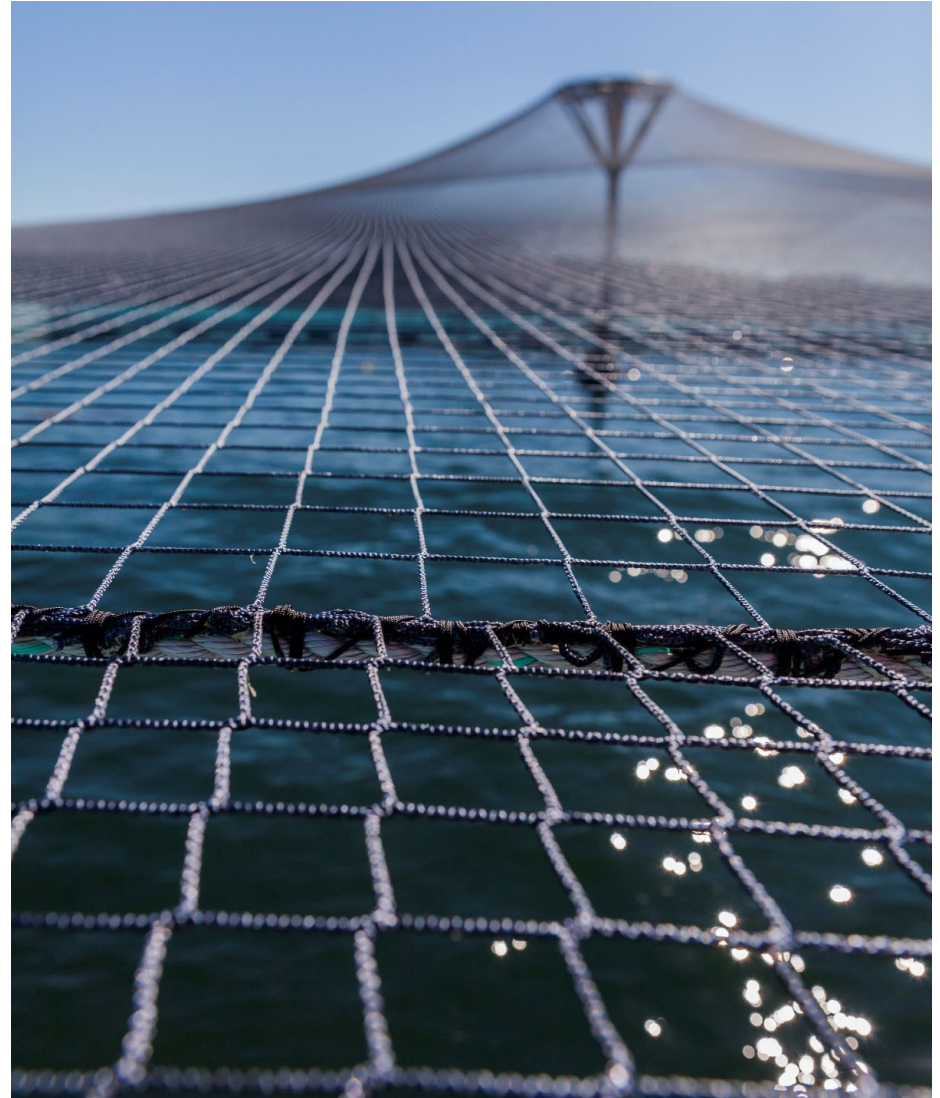

Salmones Camanchaca:

A sustainable, low-cost & fully integrated
salmon producer executing its growth and
value creation plan

Recent “waves”

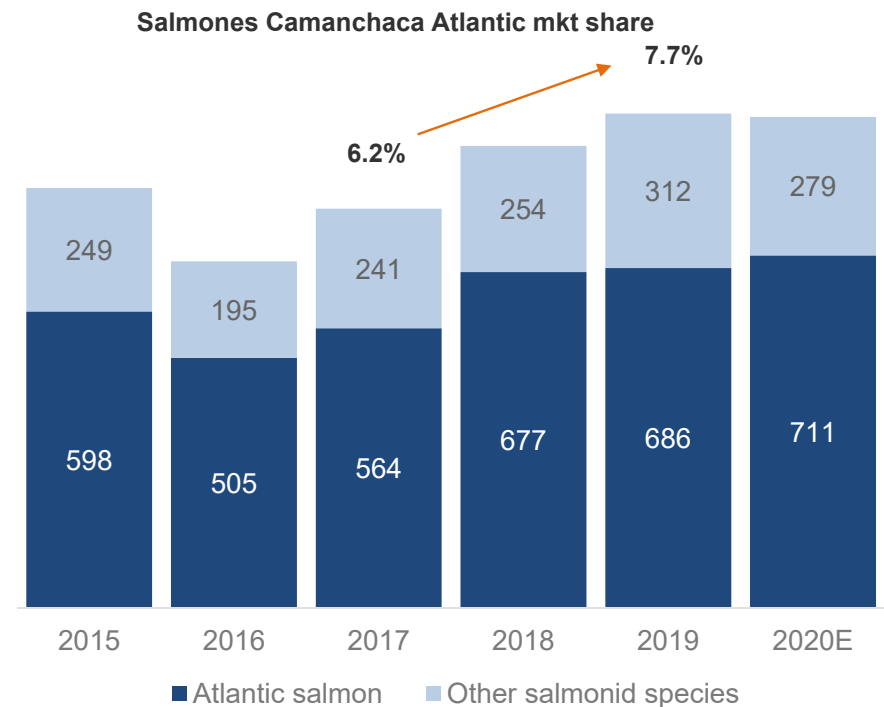

- New regulations
- Ocean conditions
- Access to markets
- Sustainability
- Emerging social demands

Wave #1

New regulations playing a role in moderating growth

- New regulations introduced 2016-2019
 - fish health
 - growth plans
 - environmental indicators
- CAGR of 3.5% last 5 years

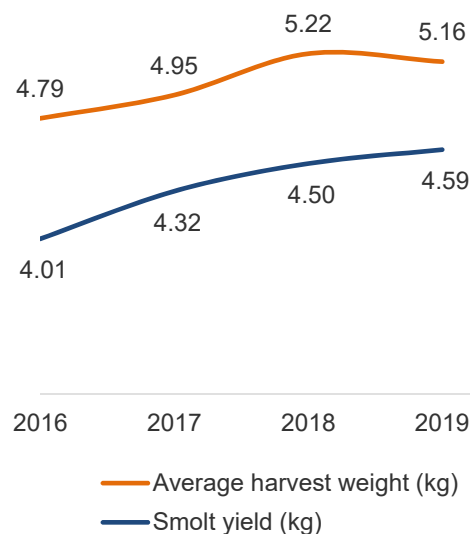

Source: Kontali analyse, equity analyst consensus and company estimation

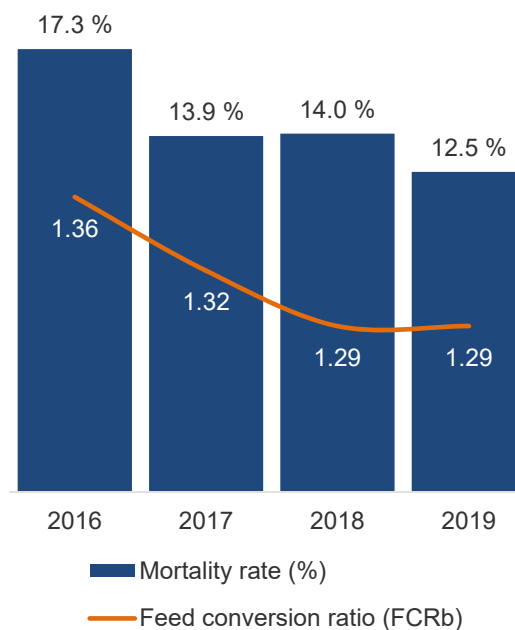

Chilean industry: Improving fish health and productivity

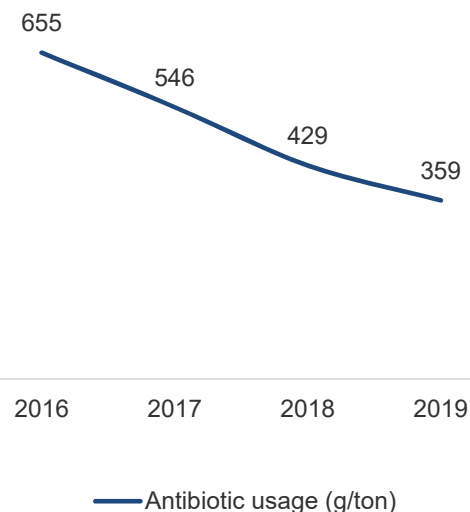

Harvest weight and smolt yield

Mortality and feed conversion ratio

Antibiotic usage

Wave #2

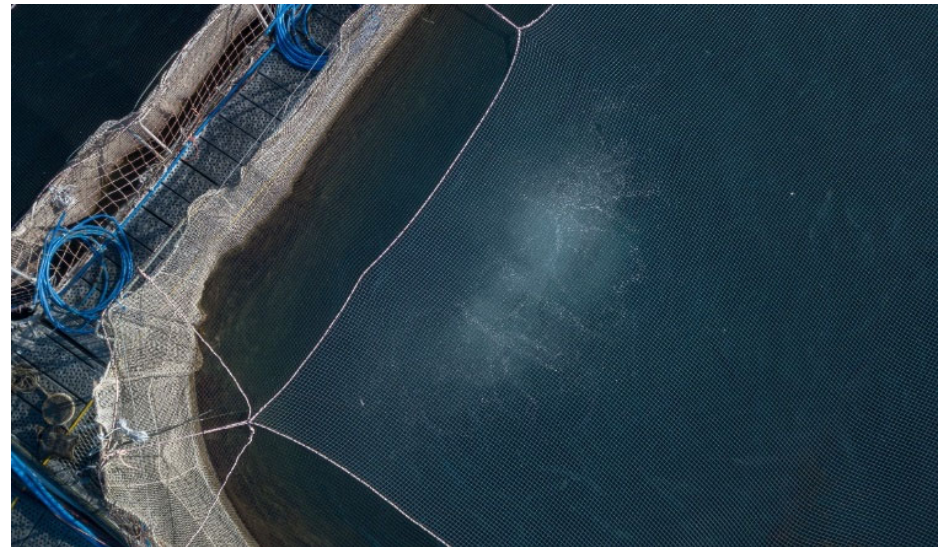

Challenging ocean conditions

- More frequent algae incidents
- More frequent episodes of reduced oxygens levels
- Sea lice: old solution losing efficacy

Acting and preventing

- 2/3 of seawater sites have now state of the art platforms supplying additional oxygen
- All Atlantic sites have upwelling systems mitigating algae effects
- All fish with sea lice protection (Lufenuron and Alfaflux) for up to 3 Kg
- Transitioning from one tool (AZM) to a toolkit of tools
- Introducing new non-pharma solutions
 - Optilicer
 - FLS
 - Salmoclinic
- So far so good: 6Kg Live Weight in Q4

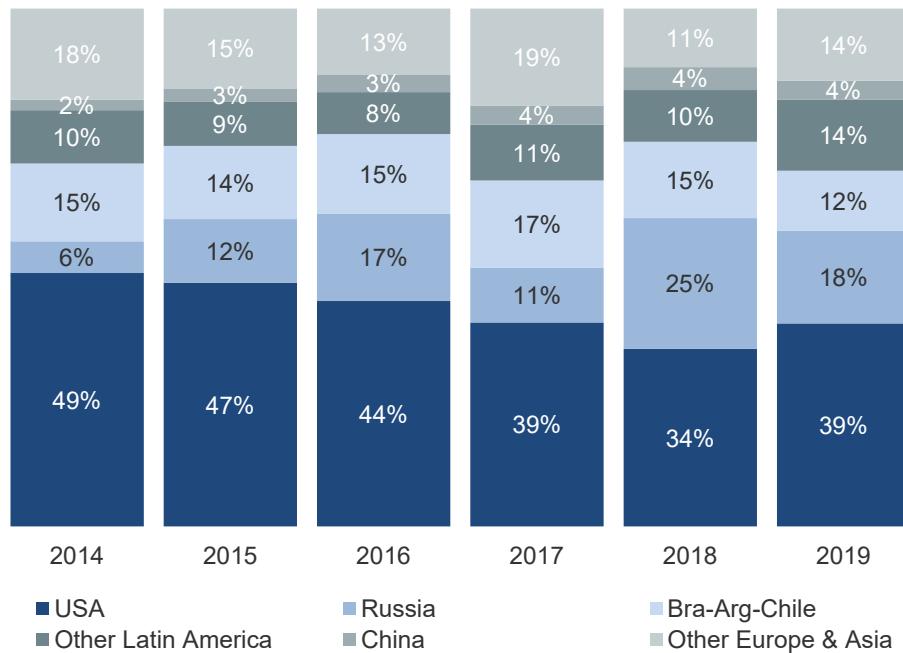

Oxzo upwelling system

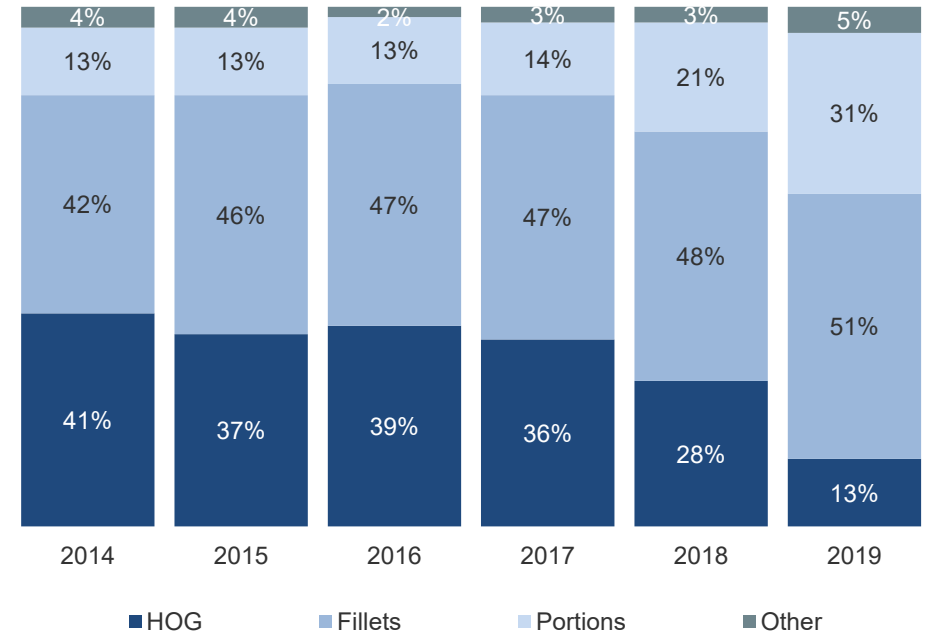

Wave #3

Adapting access by market and product flexibility

Sales distribution by market (%*)

Sales distribution by product (%*)

USA: A core and high-value market

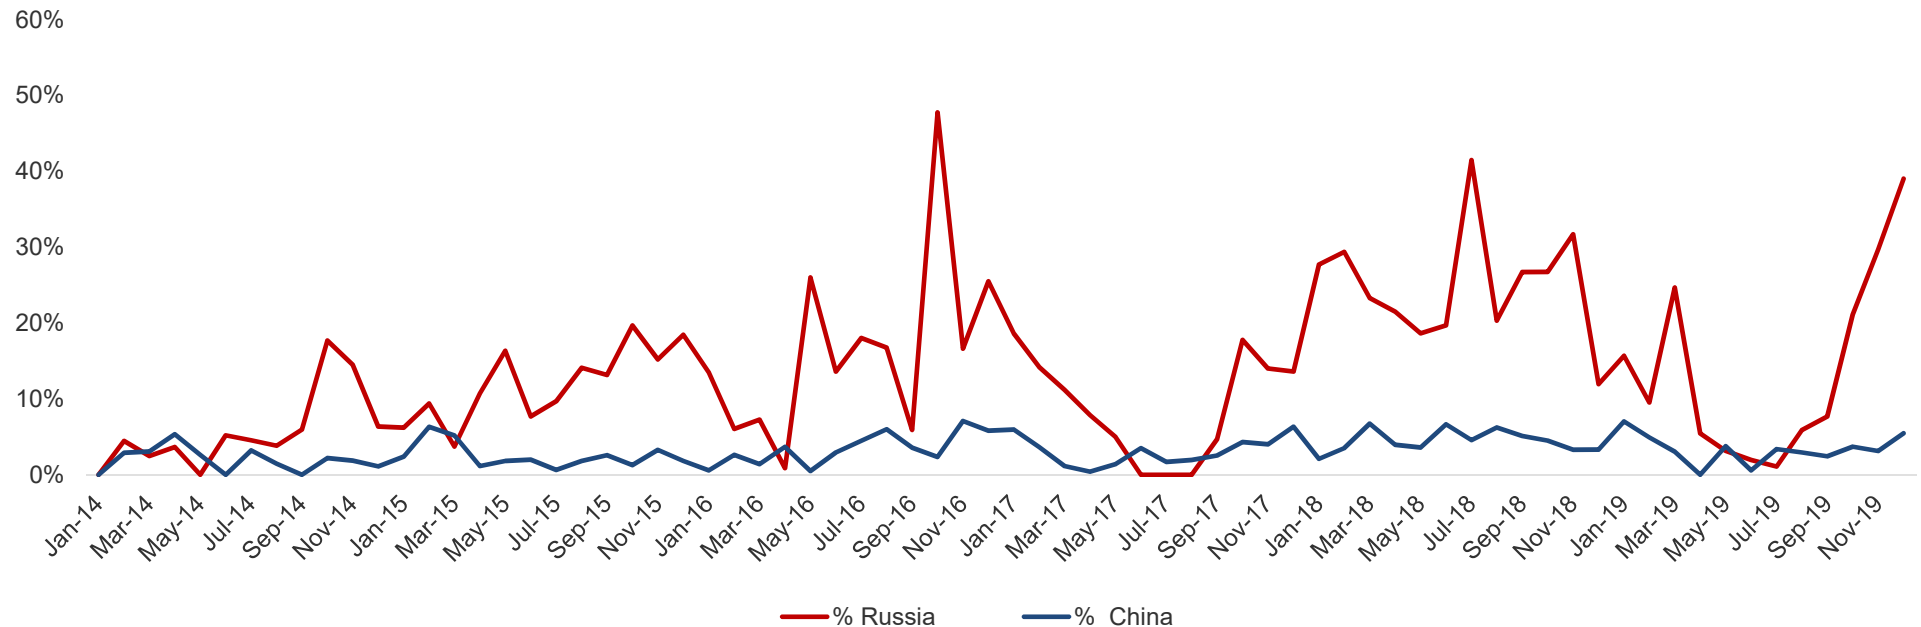

Russia: An opportunistic market approach

China: An emerging opportunity

Salmones Camanchaca monthly sales to Russia and China

% of total sales

Wave #4

Sustainability: A new cornerstone for salmon farming

Social tsunami

Human rights

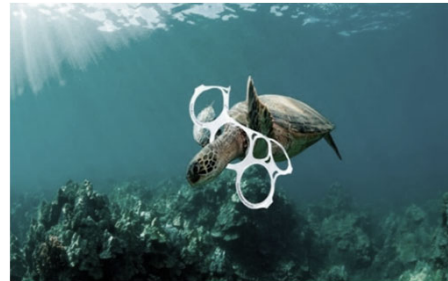

Crisis of trust

Digital transformation

Climate change

Care for oceans and ecosystems in general

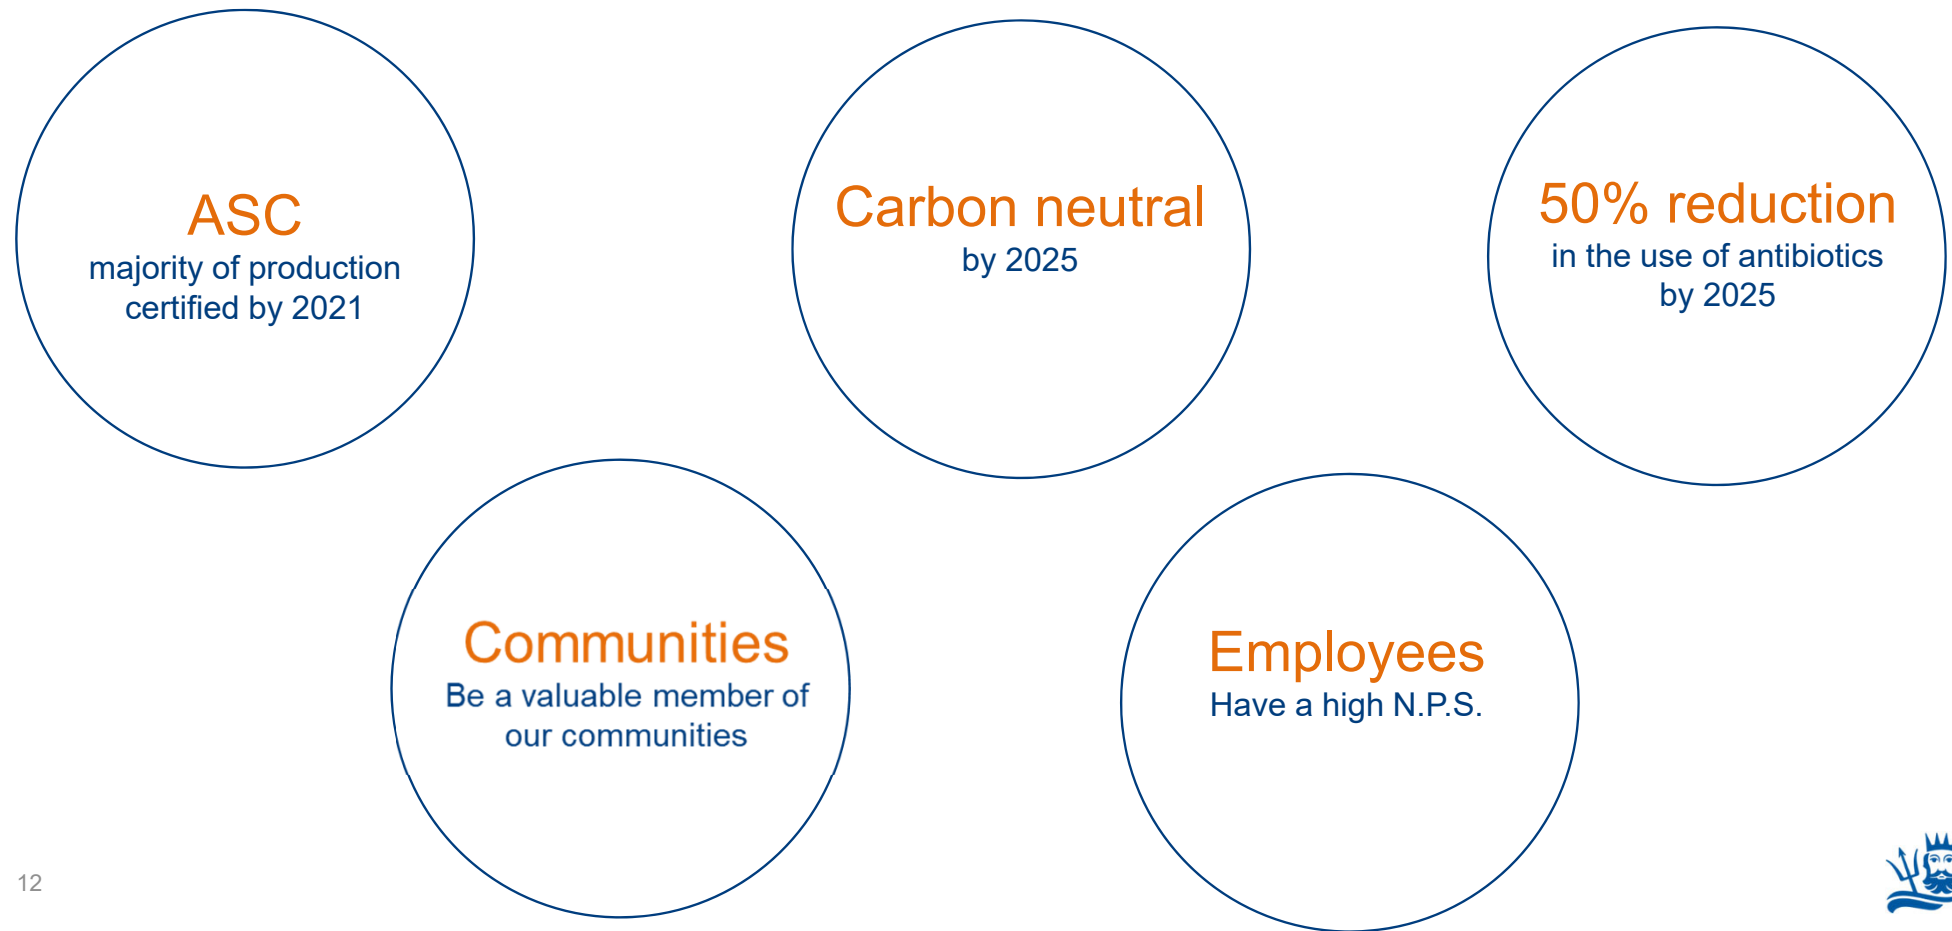

Healthy and conscious eating habits

Natural resource scarcity

Our new sustainability model sets high ambitions

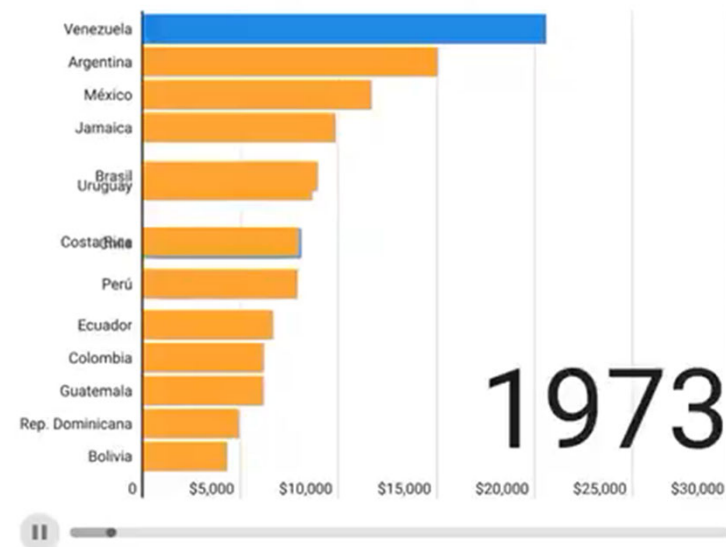

Wave #5

Emerging social demands

- Growing too fast or declining too quickly creates social unrest
- Rapid growth does not bring equal progress
- Severe depression takes wellbeing away
- Chile: a case of rapid growth

PIB per cápita (US\$ 2018)

CAIO

Recent turmoil in Chile

- A minor change in subway fare ignited extensive protests for a broad range of social issues
- Protests targeted government, public policy & sector, and private companies
- Aggravated by lack of public sector preparedness
- Agreement to propose a new Constitution
- Decreased short term country growth expectations

➡ How does Salmones Camanchaca navigate?

1st Excelling our performance to fulfill our mission

“Feed the World from the Ocean”

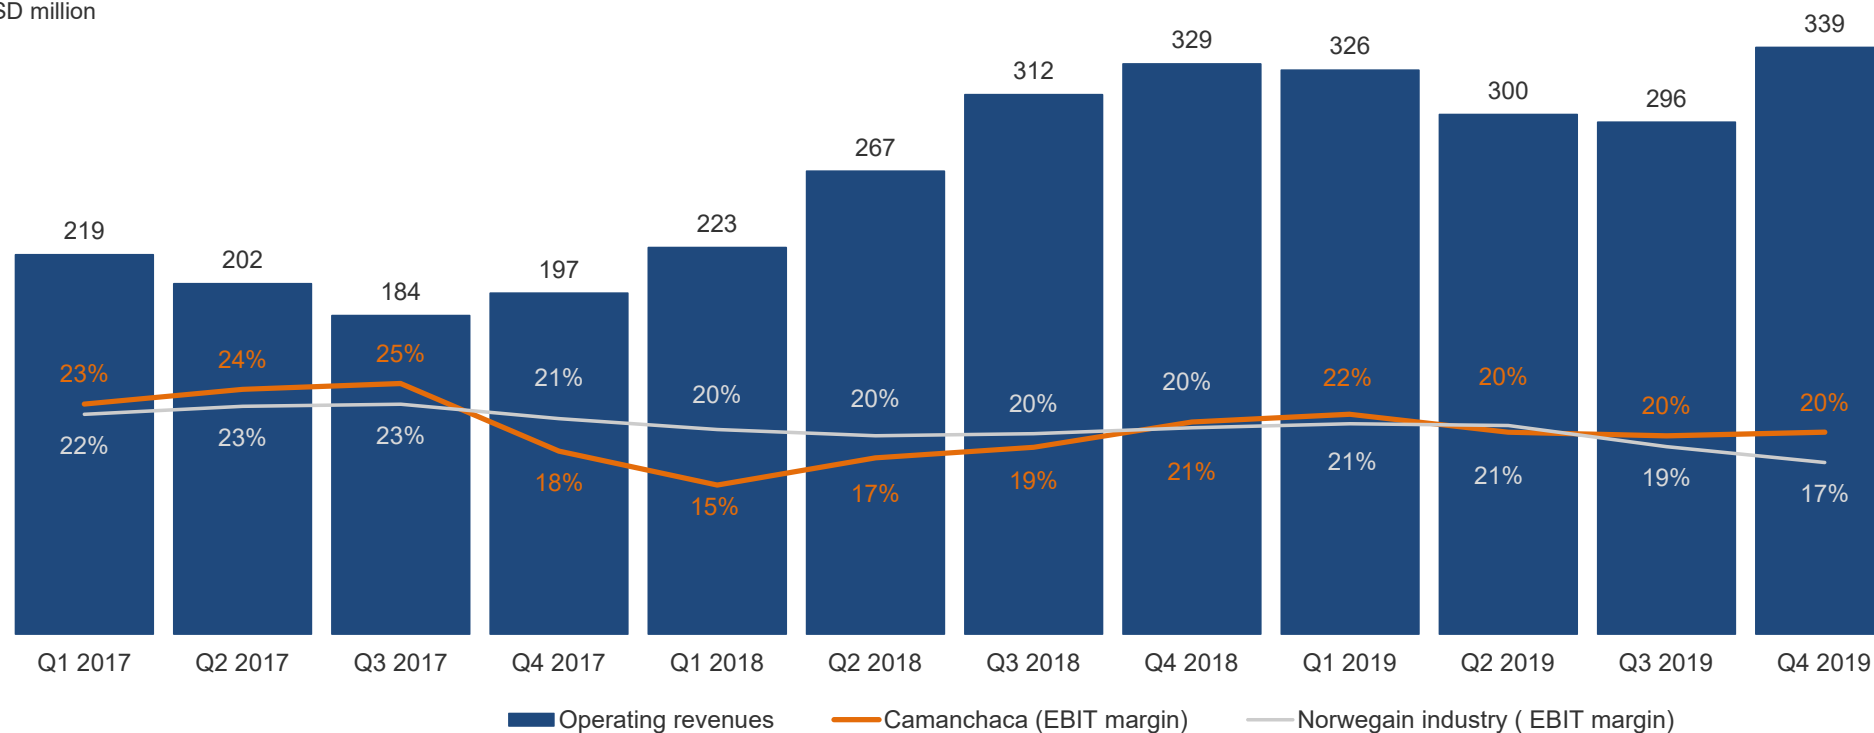

1. Farm effectively and efficiently – optimize resource utilization
2. Farm sustainably
3. Bring healthy & tasty products to the markets

Performing and delivering value

12m rolling revenues and EBIT-margin before Fair Value

USD million

2nd Positively affecting our key social stakeholders

Enhancing the experience of working in, or living close, to Salmones Camanchaca

Reaching out to employees and letting them participate and engage

Leverage our organizational capacity to help people understand their citizen role, learn how to improve their personal financial situation, and help them enhance their educational level to prosper

Affordable banking by bridging and connecting banks with employees

Enhance workers health and retirement plans, educating in how to be self sufficient

Summary

- Regulation played its role of sustainable growth
- Environmental conditions requires agile actions
- Market and product diversification mitigate accessibility risks
- Sustainability is a new cornerstone for salmon farming
- Social unrest and demands expand our role in society
- To navigate the waves and create value for all stakeholders you need the right pilot
